

Successful Rapid Prototyping with React Native

What

Why prototype

How to build prototypes (with RN)

What tools to use

who

🇫🇮 Perttu Lähteenlahti

💤 Developer & designer [@helloNyxo](https://twitter.com/helloNyxo)

🔥 I've competed in over 70 hackathons

Why prototype

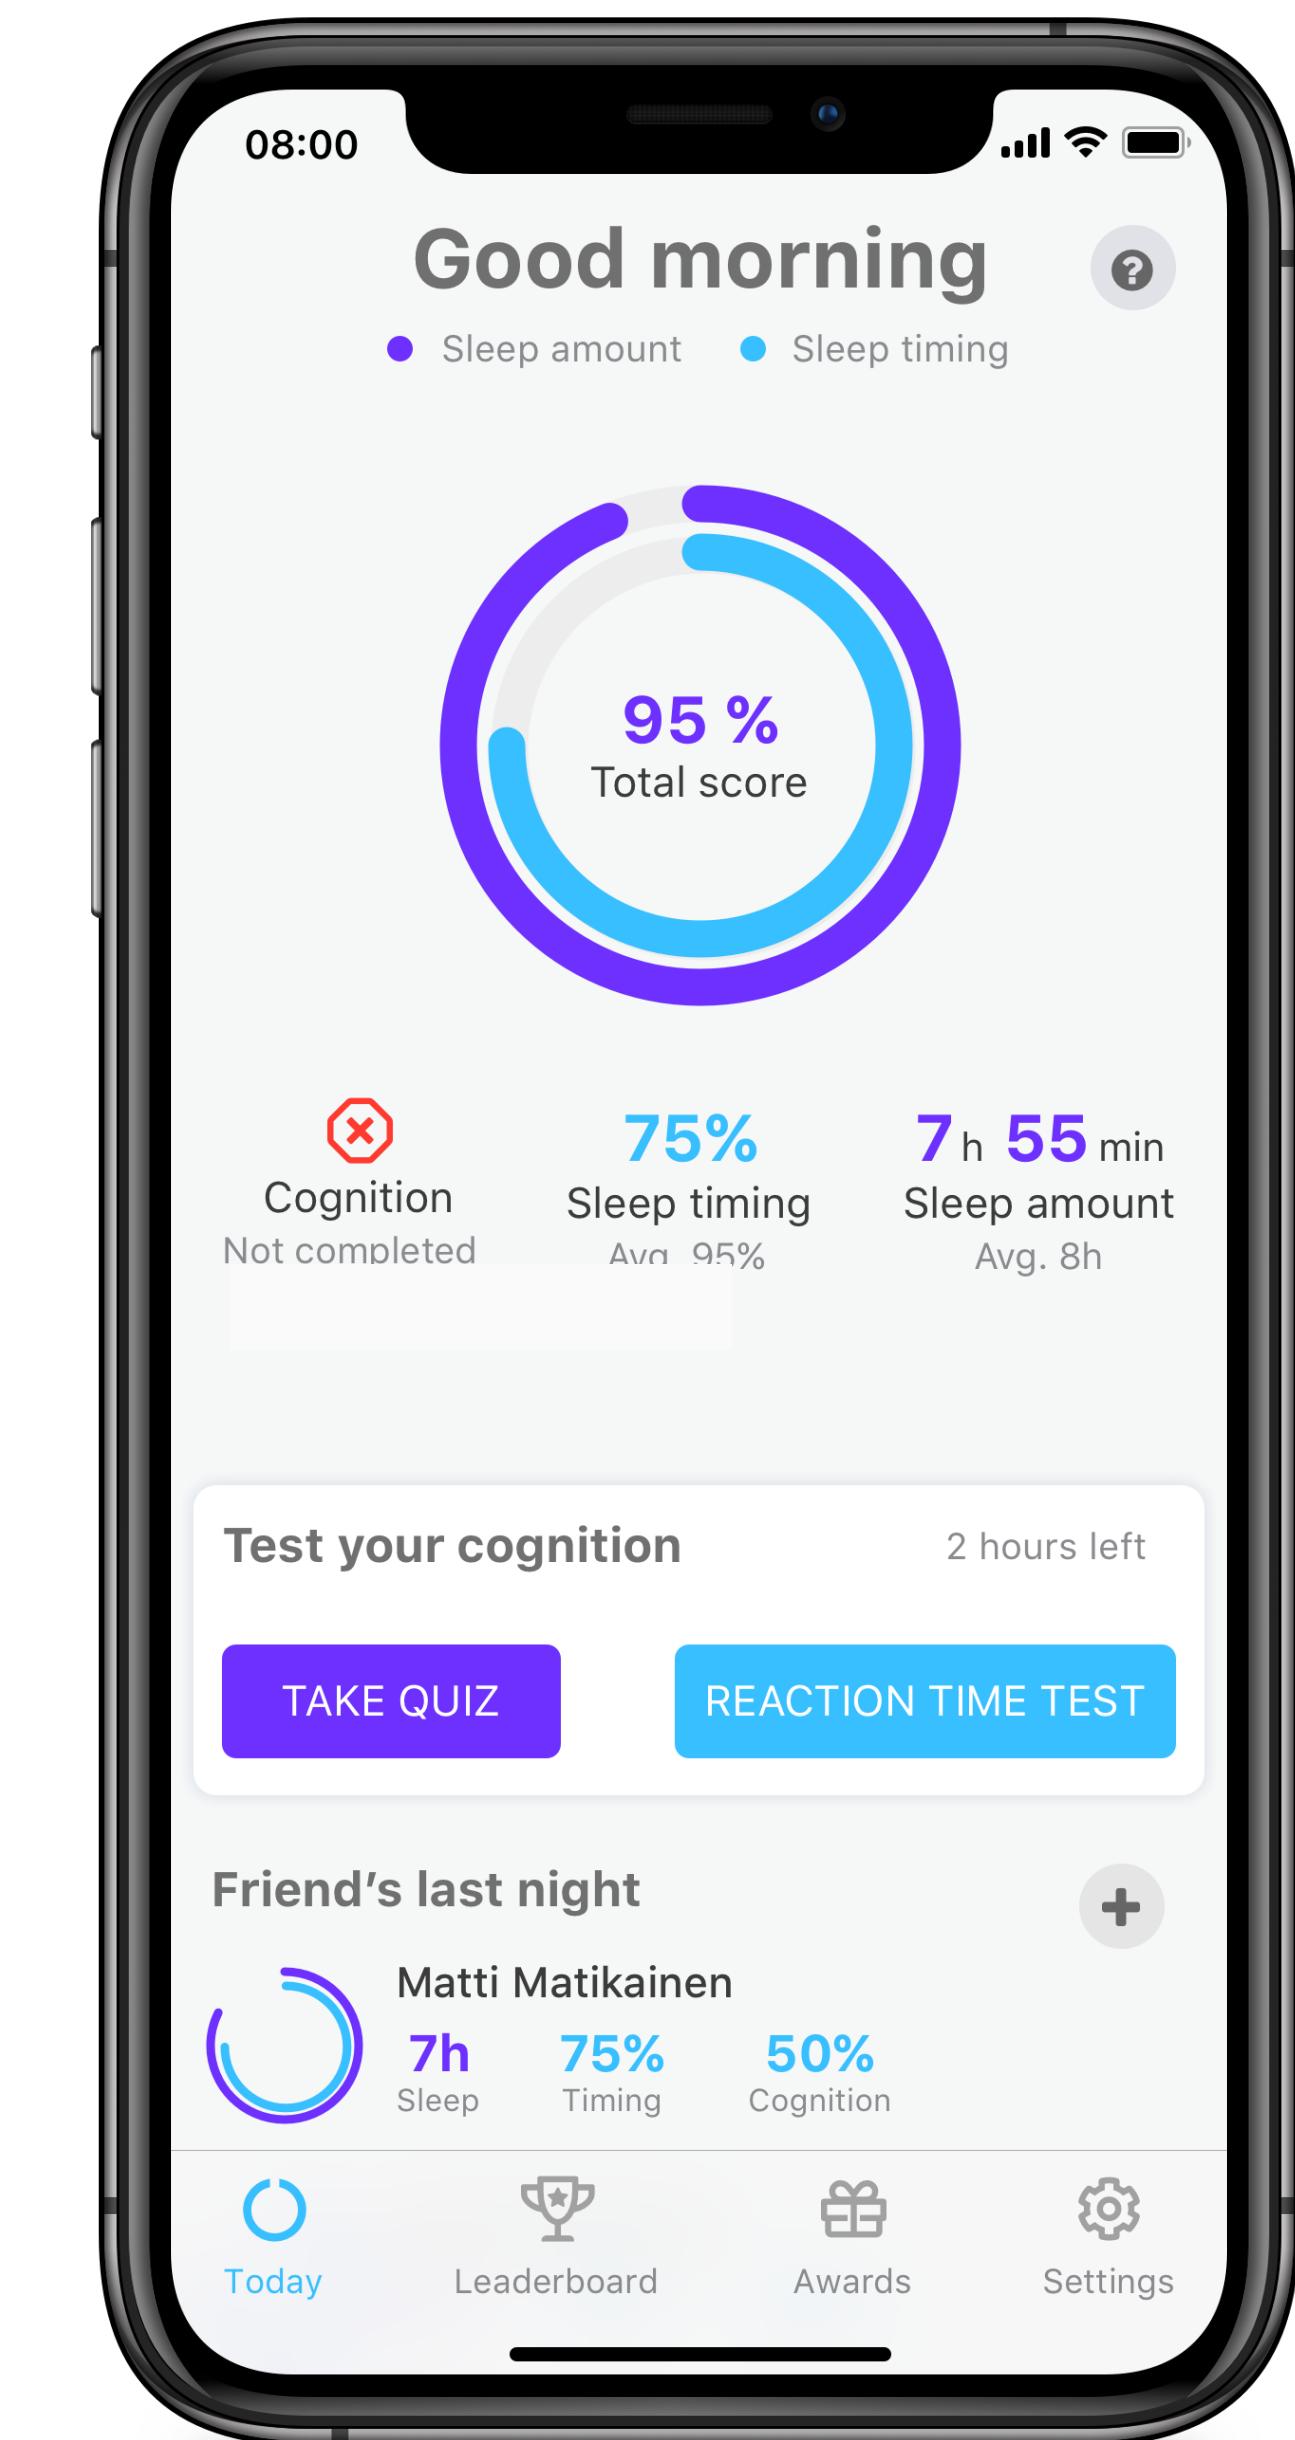

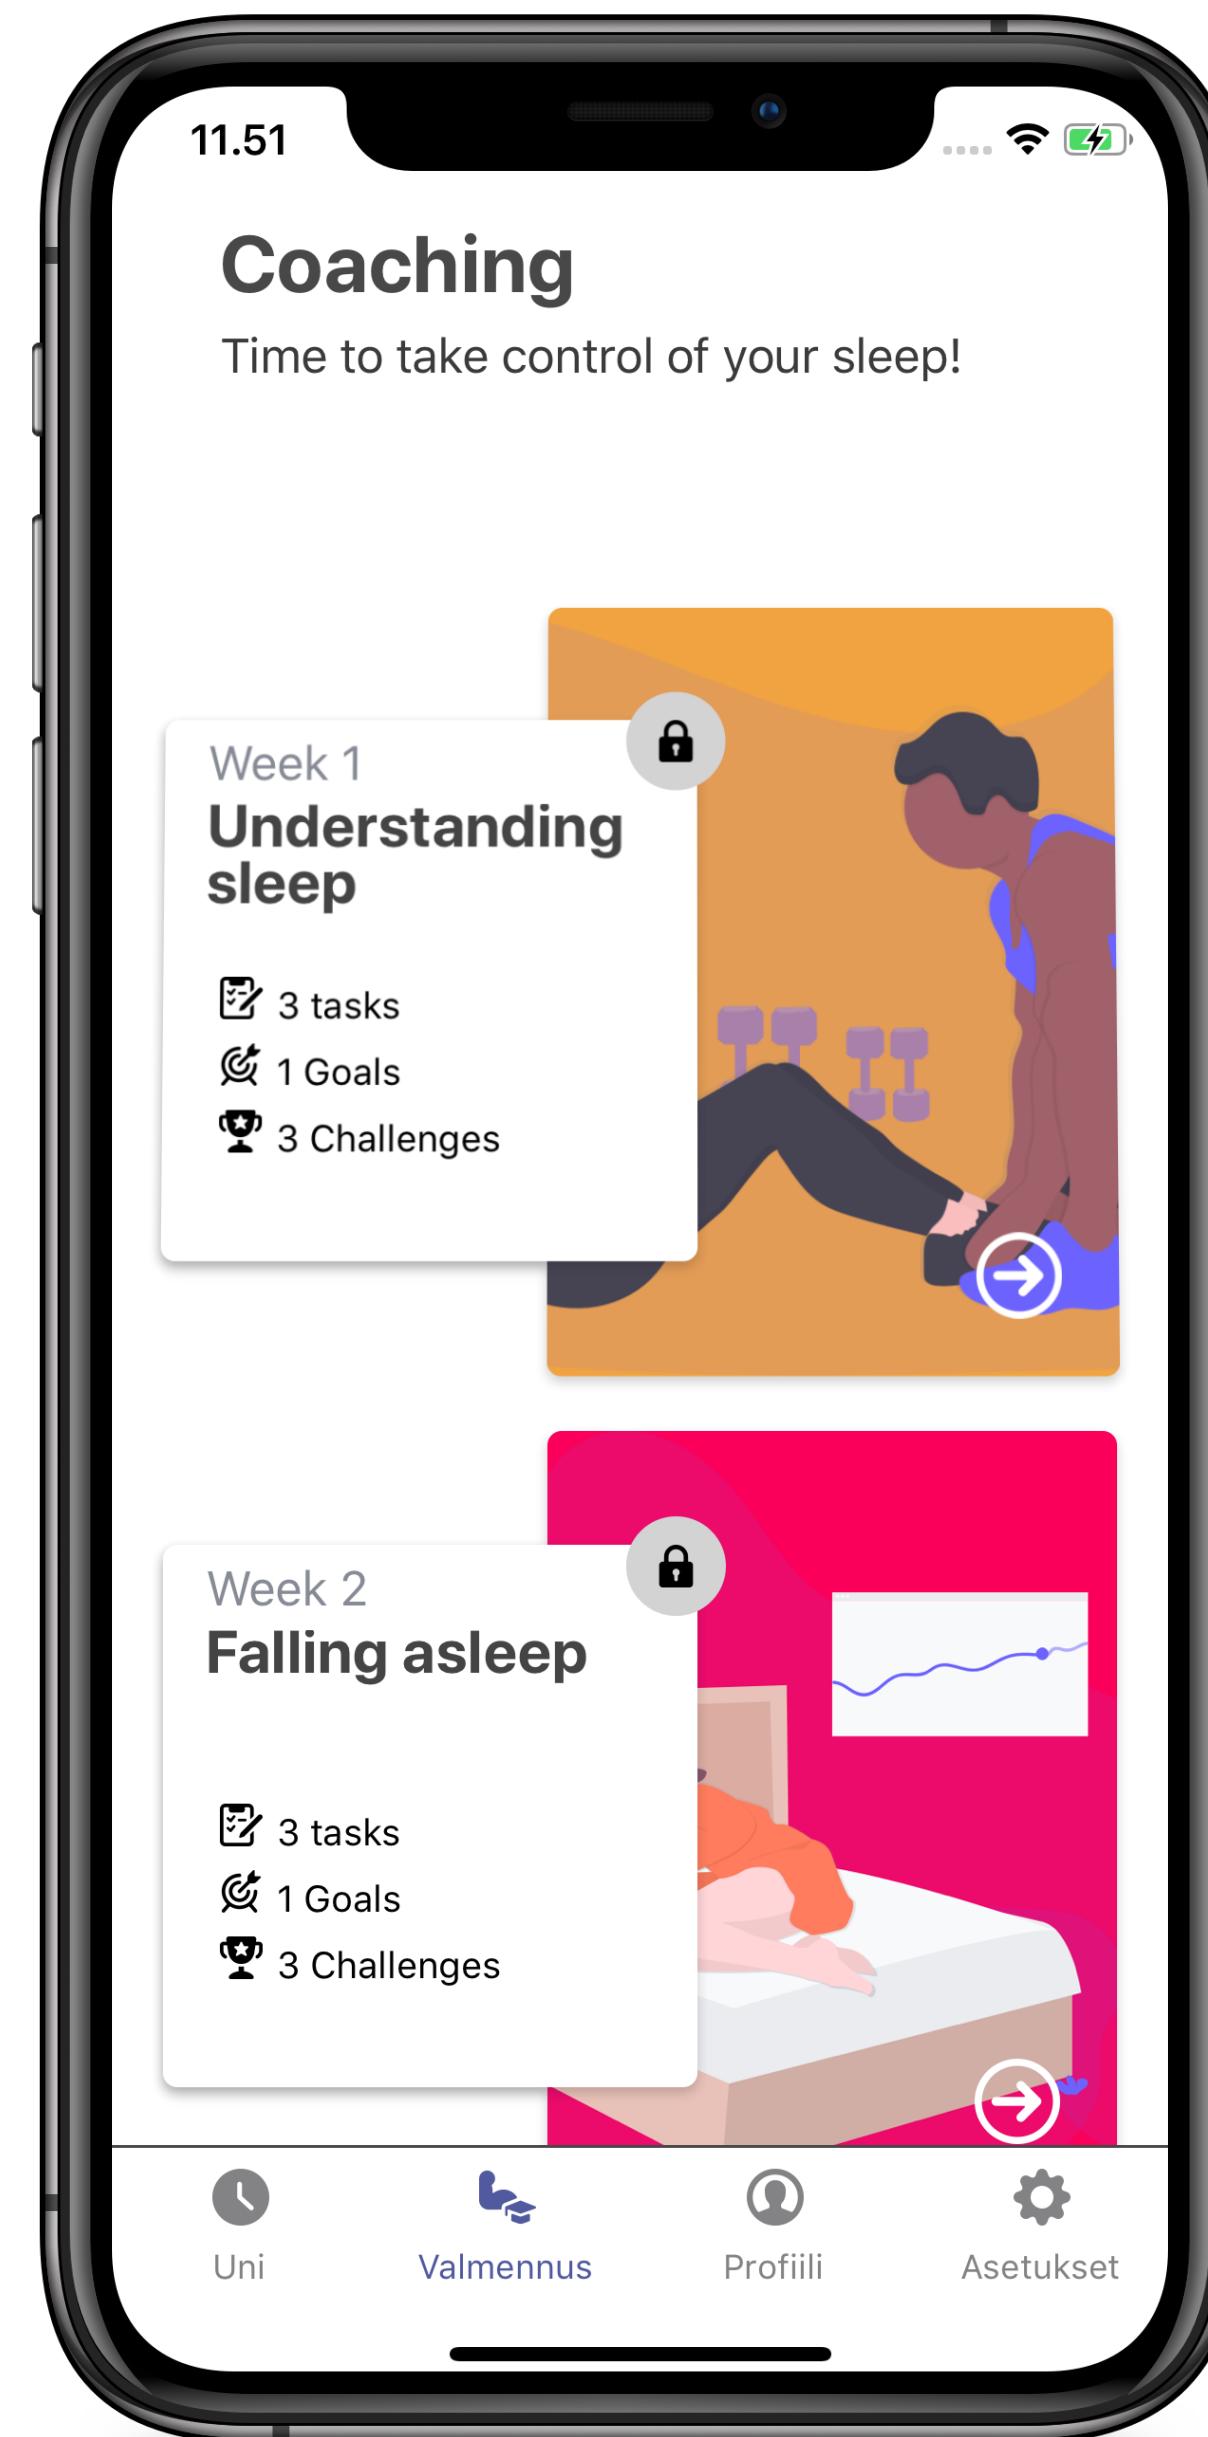

Why prototype

Starting from scratch

You have no idea what you're doing

The path is not clear

”Build us a product”

React Native is perfect

For prototyping

Build fast

Deliver faster

Measure everything

Build fast

Build fast

React Native Paper

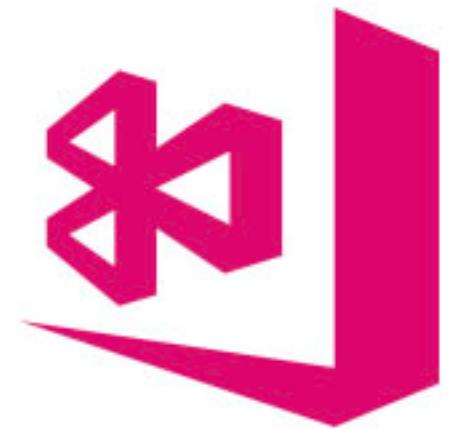

You

Deliver faster

Deliver faster

Expo

Codepush

appcenter-sdk-react-native

Remote config

react-native-firebase

Measure ~~twice~~ everything

Measure ~~twice~~ everything

Prototype is only as good as its results and feedback

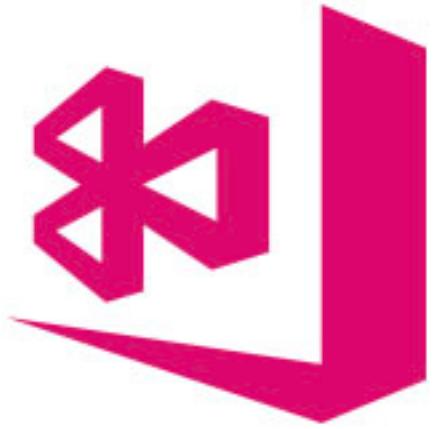

Measure ~~twice~~ everything

Amplify analytics

Firebase analytics

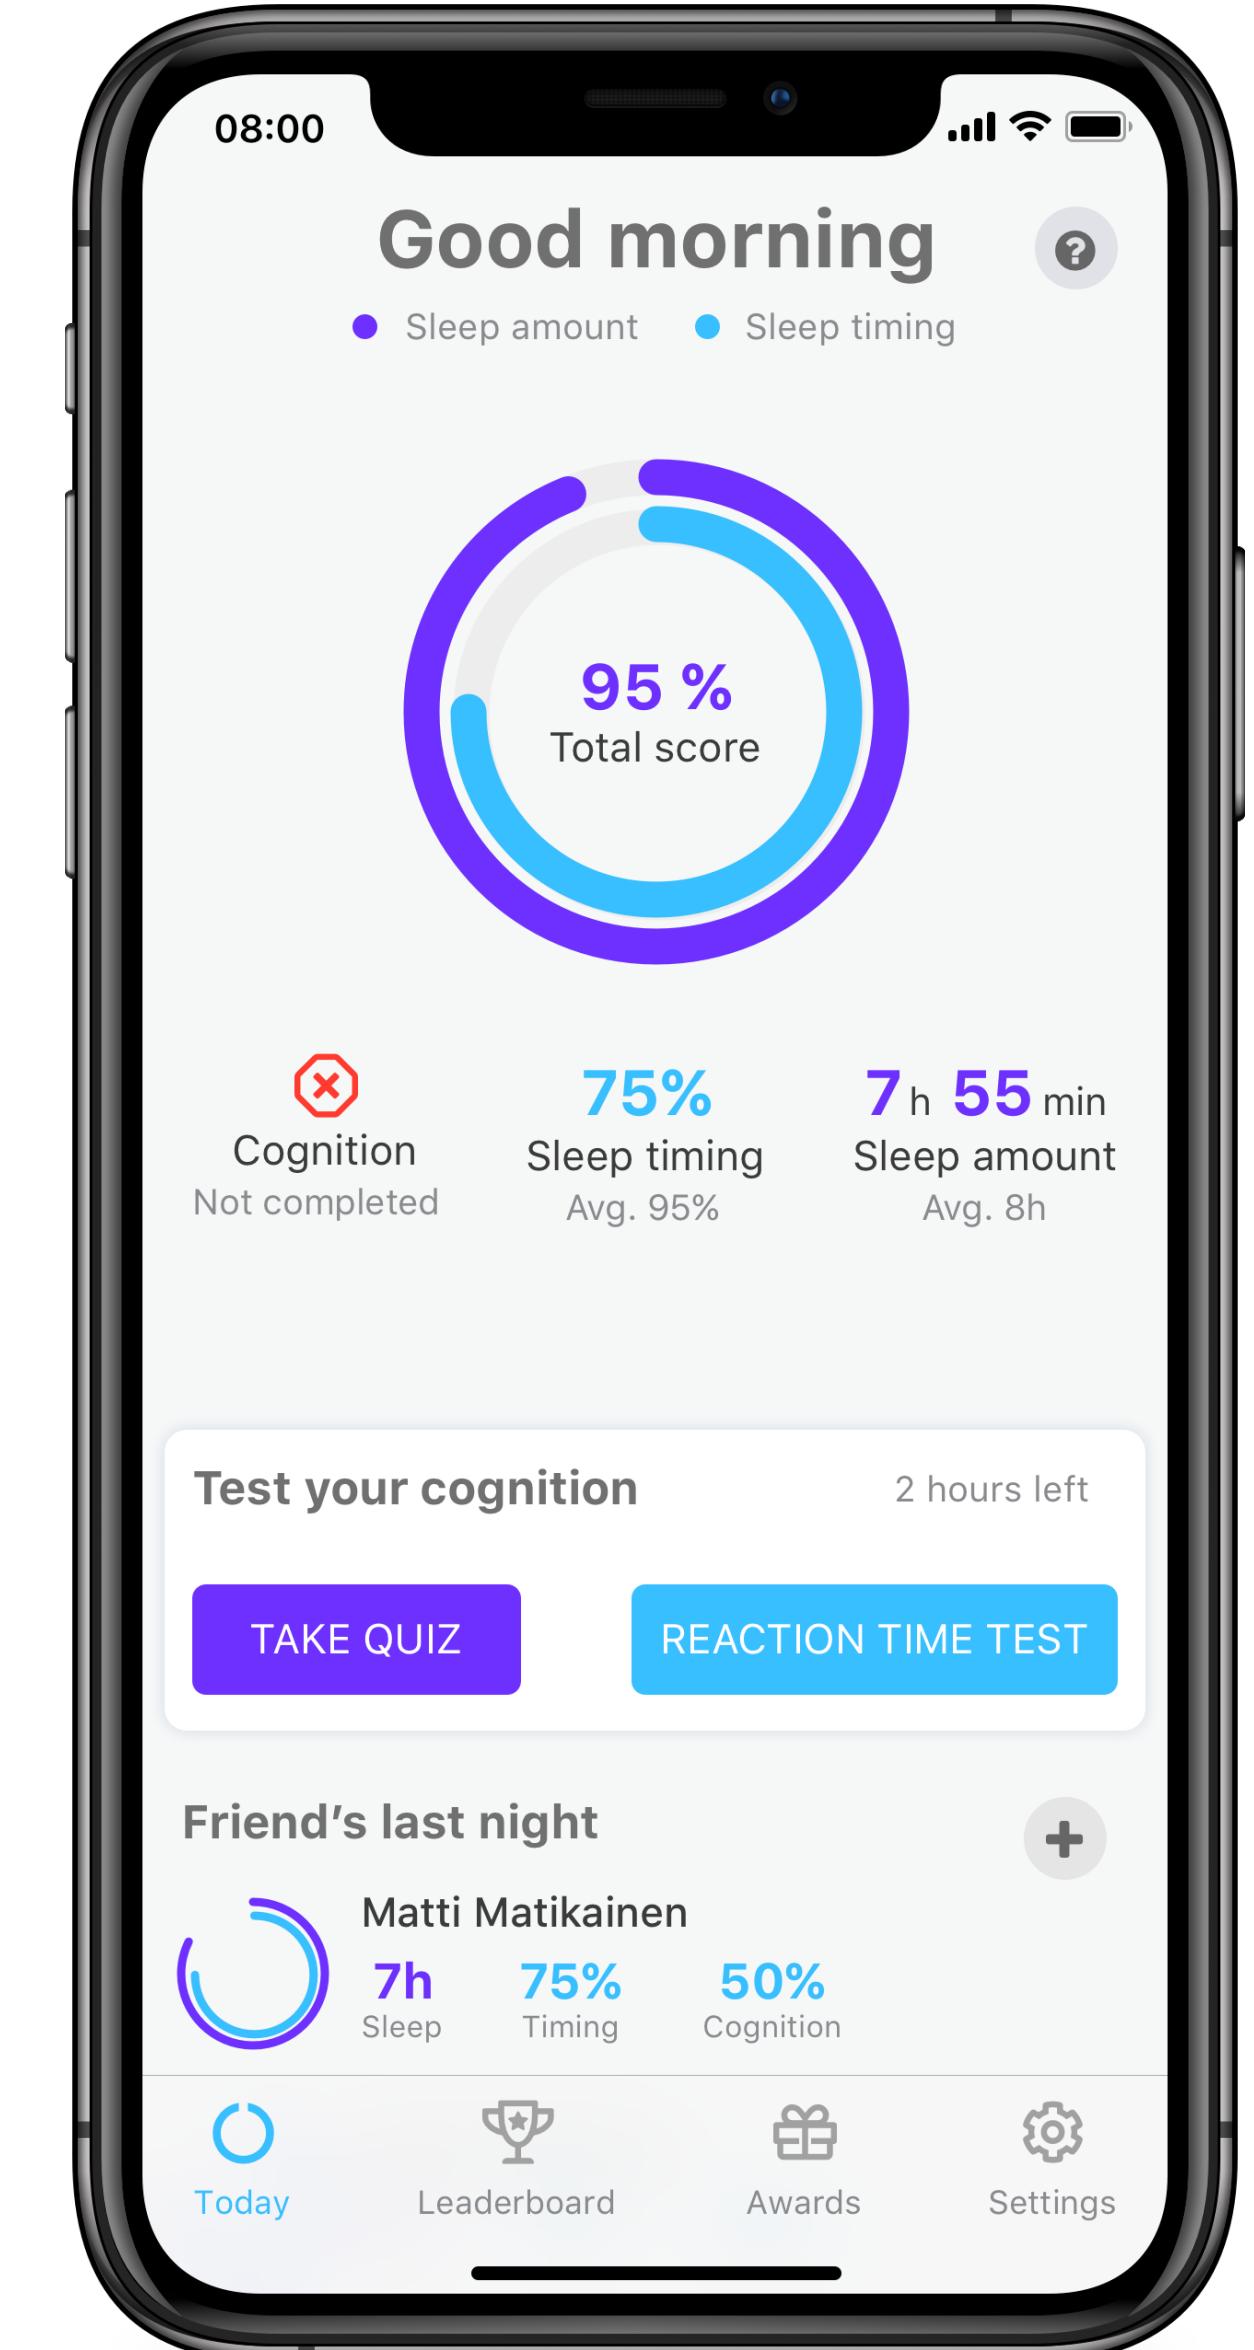

AppCenter analytics

+ Hack for measuring

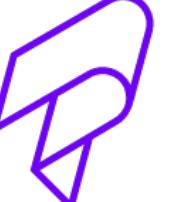

Wrap all components with

`<TouchableWithoutFeedback>`

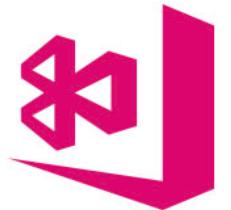

To understand what user's
perceive as buttons / clickable

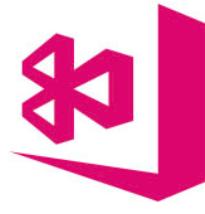

Recap

Build fast  paper 

Deliver faster  Expo

Measure everything
